RESEARCH PROFILE

MSc candidate in Procurement & Supply Chain Management with a Bachelor's degree in Management, Finance and Accounting, combining financial modelling, infrastructure appraisal, spatial analytics, and data-driven investment analysis. My current research focus is the bankability of green sukuk for renewable-energy infrastructure in Oman, using DCF modelling, WACC/DSCR/LCOE analysis, ESG scorecard design, sukuk-versus-debt comparison, and scenario-based sensitivity testing. This profile aligns with graduate-level work in project finance, Islamic capital markets, sustainability accounting, financial econometrics, and infrastructure investment governance.

PROPOSED AUS MSEP RESEARCH ALIGNMENT

Green Sukuk for Renewable Energy Infrastructure in Oman

Research proposal for MSc Accounting and Finance | Sultan Qaboos University | May 2026

- Developed a project-level framework to test whether green sukuk can finance utility-scale renewable-energy infrastructure in Oman while preserving bankability, ESG credibility, and Shariah-compliant structuring.
- Proposed a DCF-based model integrating NPV, IRR, WACC, LCOE, payback, and DSCR under conservative, base-case, and transition-accelerated scenarios.
- Designed an ESG scorecard grounded in avoided-emissions logic, disclosure discipline, use-of-proceeds traceability, Shariah governance, and external assurance.
- Built a sukuk-versus-debt comparison framework covering profit rate, tenor, issuance cost, investor base, reporting burden, risk allocation, and strategic fit.
- Defined expert-validation logic using Islamic finance, energy-sector, ESG/reporting, and policy/regulatory experts to test assumptions rather than treat interviews as proof of viability.

EDUCATION

INSEEC Business School | Lyon, France

MSc Coursework, Procurement & Supply Chain Management | Oct. 2025 – Present

Relevant focus: procurement analytics, supply-chain decisions, cost analysis, operational performance, digital transformation, business analytics, and data-supported decision-making.

Université Internationale de Casablanca (UIC) | Casablanca, Morocco

Bachelor's Degree, Management, Finance and Accounting | Sept. 2022 – Jul. 2025

Graduated with **High Honors — Mention Très Bien**. Academic foundation in finance, accounting, management, investment analysis, and applied research.

RESEARCH, CAPSTONE PROJECTS, AND TECHNICAL WORK

AI-MCDM Investment Scoring for Smart Cities under Carbon, Energy, and Geoeconomic Risk

Independent research paper | May 2026

- Designed an AI-enabled MCDA scorecard combining XGBoost forecasting, carbon-adjusted Decoupled NPV, Real Options logic, Fuzzy-AHP/MEREC weighting, and AROMAN ranking to evaluate smart-city infrastructure under carbon, energy, and geoeconomic-risk uncertainty.
- Benchmarked the framework against World Bank PPI, EIB project, EIBIS, WDI, and ESG datasets, achieving a 45.8% reduction in MAE with XGBoost relative to Ridge regression in the original temporal validation.
- Tested carbon-price scenarios at €30/tCO₂, €85/tCO₂, and €150/tCO₂ and showed that AROMAN rankings diverged from NPV-only rankings across 25 infrastructure projects, supporting auditable multi-criteria investment scoring.

Predictive Investment Modelling and Spatial Analytics for Outdoor Advertising Infrastructure

Graduation project / PFE | Casablanca, Morocco | 2025

- Evaluated the profitability of static OOH and digital DOOH advertising infrastructure in Casablanca using traffic flows, socio-economic indicators, regulatory constraints, and operating-cost assumptions.
- Combined SUMO traffic simulation, QGIS mapping, demographic analysis, CAPEX/OPEX/TCO modelling, ROI calculations, and a Potential Profitability Index to prioritise advertising locations.
- Identified stronger investment potential in high-congestion corridors and affluent districts, while showing that DOOH assets require stronger monetisation logic to justify higher upfront costs.

PROFESSIONAL EXPERIENCE

Business Analyst – Financial Performance Intern | SAN MAROC | Feb. 2026 – Aug. 2026 | Casablanca / Remote

- Segmented recovery portfolios by ageing, recovery probability, and operational priority to improve monitoring of collection performance.
- Built KPI dashboards for DSO, recovery rates, portfolio follow-up, and operational reporting.
- Reduced financial reporting cycle time by **40%** through automated extraction and reporting workflows using VBA and Power Query.
- Supported management decisions by converting raw recovery data into structured indicators and prioritisation logic.

Business Analyst – Performance & KPIs Intern | 2ACOM Advertising Sales Agency | May 2025 – Jul. 2025 | Casablanca, Morocco

- Built a five-year OOH/DOOH financial model using ROI, CAPEX, OPEX, TCO, break-even logic, and zone-level profitability prioritisation.
- Analysed investment scenarios for static and digital advertising assets under traffic, visibility, cost, and regulatory constraints.
- Supported the development of a data-driven approach to advertising infrastructure investment and campaign-performance evaluation.

Analysis & Reporting Intern – Client Portfolios & Risk | MAGHREBAIL Leasing & Financing | Jul. 2024 – Aug. 2024 | Casablanca, Morocco

- Analysed financial performance and credit-risk exposure across corporate client portfolios.
- Standardised reporting outputs to improve data reliability and portfolio monitoring.
- Gained exposure to leasing finance, client-risk analysis, credit documentation, and financial reporting discipline.

TECHNICAL SKILLS

- **Financial modelling and appraisal:** DCF modelling; NPV; IRR; WACC; DSCR; LCOE; ROI; CAPEX; OPEX; TCO; CBA; BCR; scenario analysis; sensitivity testing; credit-risk assessment.
- **Islamic finance and sustainable finance orientation:** Green sukuk; sukuk-versus-debt comparison; Shariah governance; use-of-proceeds logic; ESG scorecard design; avoided-emissions accounting; sustainability disclosure.
- **Data, analytics, and modelling:** Excel; VBA; Power Query; Power BI; Python fundamentals; basic SQL; dashboard design; reporting automation; regression/classification workflows.
- **Spatial and simulation tools:** QGIS; SUMO; traffic-flow simulation; spatial buffers; traffic-exposure mapping; infrastructure-location analysis.
- **Decision-support methods:** MCDA; Fuzzy-AHP; MEREC; AROMAN; TOPSIS/COPRAS benchmarking; XGBoost; Real Options reasoning; robustness and sensitivity checks.

LANGUAGES

- **French:** C2 / bilingual level (TCF 693/699).
- **English:** DET 110/160 (B2); preparing IELTS/TOEFL/PTE where required.
- **Arabic:** native.

ACTIVITIES AND INTERESTS

- **Leo Club:** community-service and student leadership activities.
- **Cultural & Artistic Club, UIC:** student-life and campus-event participation.
